

To Whom It May Concern,

I own a small gift and personalized apparel shop. This business started from my home, but quickly grew into a brick and mortar storefront. Although the store has done well, it has been a struggle to keep inventory fresh so that customers continue to come in. Once I had used up personal savings, I turned to business loans and credit cards to try and keep inventory up, and also to purchase a new embroidery machine. This turned out to be a mistake, because I took three different loans taking daily and monthly payments from my business checking account. My sales were not keeping up with my expenses, vendors, employee pay, and the loans. This caused me to go overdrawn, incurring hundreds of dollars in NSF fees.

When trying to find a way to restructure this debt, I found Corporate Turnaround. Although it was a struggle at first, and a lot of work, they were really able to help me. There were times I didn't think I was going to make it, but Adam and his team were patient & always worked with me. Thanks to Corporate Turnaround, I have now paid off all that bad debt, and my business is still going!

Sincerely,

Your company's results may vary. Every restructuring has a unique combination of issues and factors, including the length of participation in the program. All of these variables affect individual outcomes. There are no "typical" results. There are no time limits for reaching settlements. Debts may increase until a resolution is reached.
